Subject: Microsoft Settlement

I do NOT feel comfortable with this settlement. Please do not make it easier for Microsoft to tighten its strangle hold on the American people.

Every day I try to convince someone else to try an operating system besides windows. Linux, BeOS, or MacOS are all good choices. They tell me "Why switch when I know that Microsoft will bully any other competitor out of the way?"

I don't have an answer for them right now. When I see the direction this case is going, I cant argue with them on that point. Why try to evangelize when Microsoft is above the law?
